**NOTICE INVITING TENDER FOR SELECTION OF CONTRACTOR
FOR BOREHOLE IN THE EMBASSY OF INDIA, BRASILIA CHANCERY
COMPLEX**

SCOPE OF WORK

The Embassy of India, Brasilia requires a Tubular Well Drilling on “**Lump-sum basis**” at the Chancery-cum-Residential Complex at SES 808 Lote 24, Asa Sul, Brasilia with 6’ Dimension Drilling in the Rock at the area identified by its representative.

The following may be taken into account while drilling the Borehole:

- **WELL CONSTRUCTION DATA** - The minimum depth or the drilling forecast will be (60) sixty meters. However, the depth of the borehole may vary according to various factors, including discovery of appropriate water source / stream for providing required level of water availability.
- **Pipes etc.** - The depth estimated may be changed to a depth smaller than the minimum, provided that the geological conditions drilled technically prevent the continuity of services, or that may cause water outflows that prevents the the operation to run properly.
- **ACCESS ROADS** - The access roads to the drilling site will be provided by the Embassy, as well as the supply of water and energy necessary for use in the drilling equipment. The removal of material from the drilling and cleaning of the site will be the responsibility of the Contractor company.
- **MATERIAL:** All the material used such as PVC coating 175 MM standard, etc. should be used strictly comply with British/EU/US/Brazilian standards.

Note : *Scope of work given below is tentative. The bidder is advised to inspect the site and understand the full scope of work.*
