

SESSION 3 Building a Circular Solar Economy
(A SERIES OF 3 WEBINARS)

THE SOLAR WASTE CHALLENGE

Financial Instruments to Strengthen the End-of-Life Solar Waste Management Practices

06 OCTOBER 2025

14:00 – 15:30 HOURS (IST) | 19:30 – 21:00 HOURS (AEST) | 10:30 – 12:00 HOURS (CET)

Virtual
Register Now

Transition to a **circular solar economy** requires more than policy and technology—it needs **innovative financing**.

Extended Producer Responsibility alone cannot meet the scale of investment needed for solar waste collection, recycling, and material recovery. Future-ready solutions like **green bonds, blended finance, carbon credits, and second-hand solar markets** can unlock new opportunities for sustainable end-of-life solar waste management - mobilize capital and create sustainable systems.

Join ISA's final session in the three-part webinar series to explore:

- ▶ Financing pathways for large-scale solar waste management.
- ▶ Profitability models for recycling and second-hand solar markets.
- ▶ Global best practices and innovative financial tools.
- ▶ Cross-sector partnerships to build a resilient circular economy.
